

In this survey, you will be doing three different tasks. Each task contains 6 elements and you will answer the same two questions in all three tasks using the elements. The first question asks you to Click on the color that fits the shape of the marked buildings best. Each building will always be covered with two different shapes marked with two different colors. To answer the first question you need to click on the color that you believe fits the shape of the building best. The task will explain how many buildings that needs to be selected for the active task. The number is shown here.

The building(s) you are supposed to select is listed here on the left. Here you can easily see which buildings you have selected and which you have not. To answer question one you need to click on the color you believe fits the marked building best.

To more easily decide on which shape that fits the buildings best there are two help functions present on the map.

- On the top left there are two zoom buttons, use them to zoom in and out on the map. Move the map window with your cursor like this.
- On the top right is a hide show menu. Here all shapes are already selected. To unselect a shape covering building 1, press here. Notice that there is only one color covering the building. You can unselect the second shape by clicking here. Now you can see the building more clearly on the map. To view the shapes again, click on the same buttons. Remember that you can only select a shape by clicking on it on the map. The hide show menu does not select it for you.

The next question asks you to decide with row gives the most informative information about an arbitrary (random) building. Each row represents a new building. You do not have to remember the building on the previous task, the two questions are independent of each other. By informative information about a building, in this study, we mean that you should select the row that you believe gives the best and most correctly information. Remember that the information you choose should be informative for everyone, independent of education, background, age etc.

The number of rows you need to select will vary between the three tasks. How many rows will be written here on every task. You select a row by clicking here. When enough rows are selected the finish button will enable.
